**Subject:** CES permit conditions

Hi Calvin,

Attached is draft permit text for the CES Class VI permit.

The permit text is primarily boilerplate (by design, as the Class VI requirements focus on the project plans/attachments). However, I did read the entire document to confirm that it is in line with what CES is planning to include in their attachments.

This text assumes that there will be a stimulation attachment – it sounds like something needs to be included to prevent a potential need to modify the permit down the line if stimulation becomes necessary. As you probably saw, Molly is suggesting a call.

Please let me know if you have any questions.
